Welcome to *Creature Comfort Mobile Laser and Healing Support*. Our mission is to bring cutting edge Class IV Laser Therapy to your companion animals in the comfort of their home, and to provide nutritional and immune support to enhance their healing process.

Laser Therapy stimulates the body to heal from within. It is a non-invasive, sterile, pain-free, surgery-free, and drug-free form of treatment that reduces pain and inflammation, increases blood flow to the region being treated, and accelerates the healing process.

The goals of Laser Therapy are to:

- \*Relieve pain and inflammation
- \*Restore range of motion and function
- \*Reduce or eliminate medications needed for pain control and inflammation
- \*Provide a higher quality of life for the patient

Quite simply, patients who suffer from any combination of pain, inflammation, or slow-healing wounds benefit from laser therapy.

Whole foods supplements are added to the treatment protocol to give the body a strong foundation for healing.

Thank you for choosing *Creature Comfort Mobile Laser and Healing Support* for your animal companion's return to health and well-being.

## What to Expect:

There is an initial \$40 consult fee for the first visit, in addition to the first laser treatment. A very thorough history will be taken, any referring veterinary records will be reviewed, a physical exam will be performed, and a treatment plan will be created during this initial visit, along with the first laser therapy treatment. Please allow between 1 and 1.5 hours for this initial visit.

Laser treatments range from \$70-\$135 per session depending on the distance to your house. This includes 1- 6 areas being treated. There is an additional fee of \$25 if more than 6 areas are to be treated. An estimate will be provided for the first visit when you schedule your appointment.

Appointments may be set up via phone or email. Please call 910-232-7679 or 828-357-8291 or email [creaturecomfortlaser@yahoo.com](mailto:creaturecomfortlaser@yahoo.com) to schedule your appointment.

We will set up a time that works best for you and set up a half hour "window" for arrival.

You are able to hold your pet during the laser treatment, as long as you wear the protective eyewear provided by *Creature Comfort Mobile Laser and Healing Support*. Your animal friend may also have treats or anything else to make them comfortable and relaxed during the session. We recommend that the treatment area be calm and quiet and conducive to relaxation for your animal companion.

The length of each laser application typically lasts between 3-10 minutes per site being treated.

The laser is applied directly to the skin or near the skin depending on the condition.

There is no need for the fur to be clipped or for any special preparation prior to the treatment.

Normal activity is fine before and after the treatments.

*\*\*\*Creature Comfort Mobile Laser and Healing Support* proudly works with rescue groups and shelters to bring laser therapy and pain relief to pets who are still waiting for their forever homes. We are also honored to work with animals in therapy and in service.
